We have designed the **Basic Assistance Harness (BAH)** with the dog's physical structure and movement in mind, then added features to make it user-friendly. Guided by a veterinary orthopedic surgeon, this harness allows the dog to move, breathe, and work unencumbered by the equipment. User-friendly features make this harness truly accessible. Our harness does not slip or shift, making it the most ergonomic and stable service/assistance dog harness available.

This is not your average service dog harness! It is unlike any other "off the shelf" harness or vest that claims to be for "mobility" or support. The BLD Basic Assistance Harness is properly designed to offer the support and security you need, and is correctly designed to fit the dog's body to distribute weight and minimize pressure points. This harness is extremely durable, and we **guarantee** the quality and workmanship. This will be the only harness your dog will need throughout his working life.

The **Basic Assistance Harness** is ideal for those who need counterbalance and/or pulling support, or who need to stay in close communication with their partner. It's perfect for medical alert dogs. Also great for transferring to or from a seated position. Can be used as a part-time wheelchair pulling harness.

The harness is hand made from top quality leather and rust-free hardware. It is fully padded with layers of high-density neoprene and lined with thick natural shearling (real sheepskin) to prevent both chafing and slipping. This wool is comfortable, durable, breathable, and easy to clean.

Every strap is custom cut to assure a perfect fit. Straps and parts can be replaced if needed. The harness is flexible to allow the dog freedom to walk, breathe and lay down comfortably.

Lightweight, comfortable, flexible and highly functional, this harness is the right equipment to meet the needs of both you and your dog.

BAH Features:

- Fully padded for comfort and correct support
- Quick release buckles make it EASY to put on and take off
- Adjustable straps for a perfect fit
- Straps stay fitted to the dog and do not need to be adjusted with each use
- Proper weight distribution minimizes pressure points
- Ergonomically correct for dog's body
- Very light weight and flexible (standard size weighs just over 2 pounds)
- Flexible leather balance handle is made to your desired height
- **Balance handle can be fixed or detachable.**
- Adjustable and removable pull-strap
- 5 D-rings on harness saddle for attaching straps or accessories
- Superior quality materials and workmanship
- Top quality leather, sheepskin, and quality rust-free hardware
- **Custom made to fit your needs and the dog's measurements**
- Replacement straps are available to fit the harness to a new dog
- Great Fit Guarantee!
- Guaranteed quality and excellent customer support

This is not an “off the shelf” product. There is no middleman. You will work directly with the harness maker! Katrina Boldry will personally take your order and craft your harness to your specifications. She'll get to know you and your dog to be sure your equipment is just right and meets your needs.

Great Fit Guarantee:

Because a proper fit is essential, all initial fitting services are included in the harness price. We will make any adjustments necessary to assure a good fit within the first 4 weeks of delivery. This guarantee includes new parts and shipping, if needed. Service is available throughout the life of the harness. We are here for you.

Replaceable Parts:

This great harness has been designed with replaceable and interchangeable parts. This allows a harness to be re-fit to a new user or dog. Replacement parts allow for repairs and upgrades at minimal cost.

Super Light Weight:

Although it looks substantial and is incredibly sturdy, it also happens to be very light! A standard harness weighs about 2 pounds (less than 3 pounds for an extra large dog).

Customizable:

Other custom features may be available to meet individual needs. Let us know how we can help make equipment that will work for you.

Materials:

We use only the best materials we can find. Our Mobility Support Harness is crafted from top quality black latigo leather; it is flexible, durable, and weather resistant. We use white stitching for a handsome look. Neoprene padding and natural wool shearling are supportive, easy to clean, breathable and comfortable. We use the highest quality hardware available. Chrome plated solid brass and aluminum parts are durable and rust resistant. Each harness is custom made from scratch in our workshop.

Customer Service:

At Bold Lead Designs, we **guarantee you will love our work**. We will do our best to be sure you have the right equipment and a proper fit. We promise to be here to answer any questions you have, or solve any dilemmas you may encounter. **Bold Lead Designs' Lifetime Warranty** covers materials and workmanship for the life of the product.

Normal wear, neglect, chewing, and similar damage are not covered by our warranty, but we are able repair or replace damaged parts. Due to the custom nature of this product, refunds are not available, however we promise to work with you to create the best equipment we can. Please see our website for complete details.

Important notes: Dogs should be physically mature (growth plates fused) before beginning harness work. Dogs must be physically sound and of appropriate size for mobility work. Please be sure your dog is the right age, height, weight, and strength for the assistance you need. Consult a veterinarian to determine your dog's suitability for harness and/or mobility work.

Thank you for your interest in our lovely harness. Let us know if you have any questions.
